Franz Morat Group Gears Up for the Future with Azure Stack HCI Powered by Intel Technologies

Franz Morat is a manufacturing company with a global reach and some serious cloud constraints. The company needed to unify systems and data from on-premises systems in several countries while avoiding downtime. It also needed a way to connect and manage its hybrid landscape. The manufacturer engaged with Microsoft Partner Network member abtis to modernize its data centers with Microsoft Azure Stack HCI running on Dell EMC Integrated System for Azure Stack HCI AX nodes built on 3rd Gen Intel® Xeon® Scalable processors. Franz Morat not only improved performance, scalability, and security with Azure Stack HCI, it now has a foothold for a full cloud migration in the future. Additionally, the manufacturer avoided having to find 10 more specialized IT system administrators.

> "We've verified energy savings and reduced our carbon footprint since deploying Azure Stack HCI, which is not only a cost saving for our company—it's important sustainability legislation that we must follow."
>
> **Roland Reiter: Chief Information Officer, Franz Morat Group**
