Intel® Unnati Catalyst

When students become innovators

Intel® Unnati Catalyst is designed to support you in organising events like conferences, workshops and contests to help faculty and students enhance their knowledge and understanding of new and emerging technologies, as well as to bring out the innovation skills of your students.

The focus will be on technologies offered under the Intel® Unnati Program—such as AI, DL, AllIoT, FPGA, HPC or Smart Mobility—or other emerging technologies that are approved by Intel.

Event Guidelines

- The event should be held between May 2022 and March 2023.
- All participants should be 18 years of age or older.
- You are at liberty to allow participation by students from institutions other than your own.
- You should submit the Sponsorship Application Form in the prescribed format to our System Integrator Associate at least 30 days in advance of the event.
- The tagline “An Intel® Unnati Catalyst Event” should be displayed along with the event name and/or logo in all promotional material used in all media, except when the event name is used as a part of body text.

Based on the Sponsorship Application Form, Intel India will offer **full or partial sponsorship for up to 10 such events** during the above period. In the case of a full sponsorship, Intel will reimburse the entire cost of organising the event, while, under a partial sponsorship, Intel will, at its discretion, choose specific aspects of the event to sponsor, based on the technologies involved or other criteria it considers relevant.

If your event is selected for sponsorship under the Intel® Unnati Catalyst program, our System Integrator Associate will coordinate with you for signing a Sponsorship Agreement that will detail the Terms and Conditions of the sponsorship.

Selection Criteria

- This program is only open to educational institutions that have purchased one or more Intel® Unnati labs.
- The event should be linked to the usage of new and emerging technologies. Preference will be given to technology areas for which Intel® Unnati labs are available today: AI, IIoT, Deep Learning, FPGA, High Performance Computing or Smart Mobility.
- The learning outcomes for students, the expected number of student participants, and, in the case of contests, the nature of problem statements, would be other key factors considered while making the sponsorship decision.
- Participants should have completed 18 years of age as at the date of the event.
- For events other than contests, Intel India’s sponsorship would be limited to payment towards the cost of organising the event.
- In the case of contests, Intel India will sponsor up to ₹1,00,000 towards awards for winners, who

By setting up an Intel® Unnati Lab, you have taken the first step into a whole world of benefits. Even as it helps you equip your students with industry relevant data-centric skills in new and emerging technologies, and unleash their creative potential, it establishes you—and gives you a competitive edge—as an institution that keeps pace with fast changing industry needs and expectations.

Further, for customisations of your lab or your maintenance and support requests, you can rely on our System Integrator Associate who helped set up your lab for all your needs.

But that’s not all...

Your institution, and your faculty and students, are now an integral part of the **Intel® Unnati Community**, and that means you will have access to exclusive benefits: Apart from the **Intel® Unnati Catalyst** program, these include **Intel® Unnati Ignite** training workshops and webinars, **Intel® Unnati Grand Challenge** and **Intel® Unnati Rapid Challenge** innovation contests for students, and **Intel® Unnati Research Launchpad** grants for faculty.

could either be individuals or teams based on the event format decided by the institution.

Intel India or its authorised vendor will share these awards with the Faculty or Management point of contact at the institution. It will be the responsibility of the institution to ensure that the winners receive the award amounts; and, in the case of a team winning an award, to distribute the award amount among the team members.

- Once the event is completed, the institution should submit a fund usage report to Intel India.
- The decision to support the event will be solely at the discretion of Intel India. The decision will be conveyed to the institution through the supporting System Integrator within 15 days from the date of receipt of the Sponsorship Application Form.
- Each institution will be eligible for sponsorship support for only one event per calendar year.
